Garbage Can Enclosures (GCE's) are bear-proof welded steel boxes that can hold from one to three cans of garbage. They are permanently installed on a concrete base. If the GCE is located within 20 feet of the road there is no extra charge for garbage pick up. Containers must be located on private property, out of public right of way and utility easements.

**North Shore:
Swigard's Hardware in Tahoe City carries the most comprehensive selection of approved garbage enclosures and has them all available and on display.**

Bear Resistant Poly Carts are available locally in the in 96 gallon size. They are constructed of injection molded plastic with steel reinforced side rails and lid. They have a push to close latching system.
